Przedmiot: Architectural Design - Single Family House	Semestr: 4

Prowadzący:

- Karol Żurawski

Motto zajęć projektowych:

Durability, usability, beauty? Or perhaps a low carbon footprint, simplicity of construction and a good price?

Metoda prowadzenia zajęć:

‘Green’ villa in Komorowo.

As part of the course, we will try to find a rational form of wooden house that meets modern requirements. The project will be located in Komorów near Warsaw. The point of reference will be a nearby house designed by Bohdan Lachert and Józef Szanajca. Work on the project will be based on physical models.

Przedmiot: ARCHITECTURAL DESIGN - SINGLE FAMILY HOUSE	Semestr: IV Bachelor
Prowadzący: ● MSc. Dipl. USI AAM Jan Przedpełski	
Motto zajęć projektowych: At the center of this semester is the theme of inhabitation. Each student will design a house for a nuclear family and beyond, accommodating three to six people. To dwell in this space means participating in collective living. We will explore spaces for togetherness and solitude, study their relationships, and ask, after R. Barthes, 'How to live together?' The projects` sites are located in Podkowa Lśna, a town founded in 1925 as a garden city.	
Metoda prowadzenia zajęć: The semester program includes workshops, short lectures, and table critiques. Every two or three weeks, we will hold short pin-up presentations of each student's progress, followed by an open discussion, often with invited guests
